

AGUSTÍN DELGADO

Data & AI Specialist · Data Analytics · Machine Learning · Python · SQL · Power BI

Buenos Aires, Argentina | +54 11 5052-1473 | augusto.delgado00@hotmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data and AI professional with experience spanning healthcare analytics, business intelligence, automation and applied machine learning. Built a foundation in data analysis across senior-care operations, working with operational, administrative and financial information, reporting and KPIs. Currently apply Python, SQL, Power BI, machine learning and generative AI in healthcare operations to develop decision-support, automation and data-driven solutions. Focused on translating real operational problems into measurable improvements through data and AI.

CORE SKILLS

Python · SQL · Power BI · Advanced Excel · pandas · scikit-learn · PostgreSQL · Data Analysis · Data Visualization · KPI Design · ETL/ELT · Data Quality · Reporting Automation

ADDITIONAL TOOLS

DAX · Tableau · Looker Studio · Streamlit · FastAPI · Django · Databricks · Git/GitHub

APPLIED AI

Machine Learning · Predictive Modeling · Model Evaluation · Feature Engineering · Generative AI · Applied LLMs · AI Automation

PROFESSIONAL EXPERIENCE

Data Analyst | Senior Care Operations Approx. 2.5 years

Senior Care Facilities · Buenos Aires

- Analyzed operational, administrative and financial data across senior-care facilities to support management decisions and daily planning.
- Built KPI reports for occupancy, billing, collections, expenses and operational performance, consolidating and validating data from multiple sources.
- Automated recurring reporting and analysis, reducing manual work and improving consistency, accessibility and follow-up of key information.

Data & AI Specialist | Machine Learning & Healthcare Analytics 2023 - Present

Healthcare Clinic Network · Buenos Aires

- Analyze clinical, administrative and operational data with Python, SQL and Power BI, developing dashboards, KPIs and decision-support workflows.
- Develop and evaluate machine learning models for healthcare and operational use cases, applying feature engineering, validation and performance metrics.
- Build AI-assisted automations and data-driven systems with generative AI, LLM workflows and PostgreSQL to improve real healthcare operations.

KEY PROJECTS

Paradigm — No-Show Risk Analysis for Ambulatory Healthcare

Python · SQL · pandas · scikit-learn · Power BI · Streamlit

End-to-end analytics project built on a synthetic ambulatory healthcare dataset (12,008 records, 22 variables) to study patient no-show risk. Applied a temporal train/validation/test split and built a baseline logistic regression model to estimate no-show probability. Designed operational indicators and analytical data structures, and built a reproducible pipeline covering data preparation, model training, evaluation, and visualization in Power BI and Streamlit. Documented model performance and limitations to support further iteration.

Soma - Clinical & Operational Management Platform

React · TypeScript · Supabase · PostgreSQL · Vercel

Clinical and operational management platform currently used by healthcare professionals. Supports patient records, scheduling, clinical workflows, billing, documents, role-based access and operational analytics. Built with React/TypeScript and Supabase/PostgreSQL, with automated workflows and an integrated role-aware assistant.

EDUCATION & CERTIFICATIONS

Higher Technical Degree in Data Science & Artificial Intelligence In progress

Instituto Superior Santo Domingo

IBM Generative AI Engineering Professional Certificate In progress

Coursera

Data Analytics Program Completed: Aug 2025

Coderhouse
