PROFILE

Data Analyst with 2+ years of healthcare analytics experience and 3 years in healthcare administration and operations. Builds reproducible SQL, Power BI, Excel and Python workflows for data quality, KPI reporting, forecasting and operational decision support.

EXPERIENCE

Data Analyst | Healthcare Analytics

MAR 2024 - PRESENT

Private Medical Practices Network · Buenos Aires, Argentina

- Analyze patient attendance, appointment patterns and health-insurance utilization using SQL and Excel to support scheduling and operational decision-making across multiple medical practices.
- Maintain, validate and update patient data across medical-practice systems, improving data quality, consistency and reporting reliability.
- Produce recurring operational analysis, KPI tracking and reporting, translating healthcare data into actionable day-to-day insights.

APPLIED WORK / EVIDENCE

PROVIDENTIA / Healthcare Demand Forecasting & Capacity Intelligence

Python · pandas · statsmodels · LightGBM

Built a reproducible healthcare demand forecasting workflow comparing ETS, SARIMA and LightGBM, with time-series analysis, temporal validation, uncertainty analysis and capacity-planning decision support.

PARADIGM / Appointment No-Show Analytics

Python · SQL · pandas · scikit-learn · Power BI · Streamlit

Built an end-to-end appointment no-show analytics workflow covering data cleaning, EDA, feature engineering, SQL views, joins and aggregations, temporal validation, a BI-ready analytical layer and Power BI reporting.

SOMA / Healthcare Operations Platform **POSTGRES** · **SUPABASE** — Data-backed platform for scheduling, patient records, billing, documents and operational visibility.

Administrative Assistant | Medical Practice Operations

MAR 2021 - FEB 2024

Consultorio Barcala · Buenos Aires

- Managed scheduling, billing, prescriptions, documentation and patient records; organized operational information with Excel and digital tools, tracking appointment changes / cancellations and recurring administrative controls.

CAPABILITIES

data	SQL · Python · pandas · PostgreSQL · Data Cleaning · Data Analysis · Business Intelligence
bi	Microsoft Power BI · Microsoft Excel · DAX · Power Query · KPI Design · Dashboards · Reporting
analytics	Forecasting · Time Series Analysis · Statistical Analysis · scikit-learn · Predictive Modeling · Model Evaluation
workflow	Git · GitHub · Streamlit
learning	Snowflake · dbt · Data Warehousing · Dimensional Modeling · ETL/ELT

EDUCATION & CERTIFICATIONS

Higher Technical Degree in Data Science & Artificial Intelligence - Instituto Superior Santo Domingo

IN PROGRESS

IBM Generative AI Engineering Professional Certificate - Coursera

SEP 2026

Data Analytics Program - Coderhouse

AUG 2025
