

# AGUSTÍN DELGADO

Data Analyst | Python · SQL · Power BI | Business Intelligence & Applied ML

Buenos Aires, Argentina | +54 11 5052-1473 | [augusto.delgado00@hotmail.com](mailto:augusto.delgado00@hotmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Data Analyst focused on analytics, BI and automation, with hands-on use of Python, SQL and Power BI in real operational contexts. Builds reproducible workflows for data cleaning, transformation, reporting and model evaluation, including classification and time-series forecasting projects. Healthcare operations experience adds practical context for decision-ready analysis.

## TECHNICAL SKILLS

**Programming & Data:** Python · SQL · pandas · PostgreSQL

**BI & Analytics:** Power BI · DAX · Advanced Excel · KPI Design · Data Visualization

**Data Science:** scikit-learn · Feature Engineering · Predictive Modeling · Time Series Forecasting · Model Evaluation

**Workflow:** Git · GitHub · Reproducible Analysis

## PROFESSIONAL EXPERIENCE

### Freelance Data Analyst | Independent Data & Automation Projects

2024 - Present

Argentina / Remote

- Use Python and SQL to prepare, clean, transform and analyze data, automating recurring reporting workflows.
- Support operational analytics for nursing homes and medical practices, structuring recurring information needs into practical datasets, reports and automated workflows.
- Build KPI-oriented reporting with Power BI and Excel, using PostgreSQL for operational data storage in data-backed solutions.

### Administrative Assistant | Medical Practice Operations

Mar 2022 - Aug 2024

Consultorio Barcala · Buenos Aires

- Managed scheduling, billing, prescriptions, documentation and patient records across day-to-day medical practice operations.
- Used Excel and digital tools to organize information, perform administrative checks and improve recurring workflows.

## SELECTED PROJECTS

### Paradigm - No-Show Risk Analysis for Ambulatory Healthcare

Python · SQL · pandas · scikit-learn · Power BI

- Built an end-to-end analytics workflow on a synthetic ambulatory dataset of **12,000 appointments and 22 variables**, covering cleaning, EDA, feature engineering, SQL views/joins/aggregations and a dimensional analytical layer for BI.
- Evaluated logistic regression with a temporal train/validation/test design using ROC-AUC, PR-AUC, precision, recall and calibration, then delivered executive Power BI dashboards and KPI reporting.

### PROVIDENTIA - Healthcare Demand Forecasting & Capacity Intelligence

Python · pandas · statsmodels · LightGBM

- Developed and compared ETS, SARIMA and LightGBM forecasting across 30,747 records and 214 monthly healthcare demand time series.
- On 3,564 locked final targets, the primary ETS model achieved **9.15% WAPE versus a 10.69% naïve baseline**; evaluation also covered uncertainty and temporal generalization.

### Soma - Clinical & Operational Management Platform

PostgreSQL · Operational Data · Healthcare Workflows

- Data-backed platform used by healthcare professionals, with PostgreSQL-driven patient records, scheduling, billing, documents and operational workflows.

## EDUCATION & CERTIFICATIONS

**Higher Technical Degree in Data Science & Artificial Intelligence** - Instituto Superior Santo Domingo

In progress

**IBM Generative AI Engineering Professional Certificate** - Coursera

Completed Sep 2026

**Data Analytics Program** - Coderhouse

Completed Aug 2025

## LANGUAGES

**Spanish:** Native | **English:** B2 Upper-Intermediate - professional and technical communication
